GARDEN GIRL

GardenGirl launches garden tools for women!

Garden tools are often designed for men. GardenGirl are now launching garden tools specially designed for women. These tools are smaller, lighter and shaped for a woman's hand. This collection consisted of a pruner, transplanter, weeder, cultivator and a ladies bow saw. The bow saw is developed in cooperation with a Swedish inventor. Apart from being small and light the saw is equipped with a unique blade to facilitate the start.
